

The Misadventures of Techie the Robot!

Introducing Techie and Friends!!

Techie the Robot was created as our mascot. We thought he was so cute that he should be more than just a mascot! We decided Techie needed some friends and he should be the star of his own book series!

The Misadventures of Techie the Robot was created! Here's our exclusive cool cast of robot characters:

Techie

Bluberri Pi

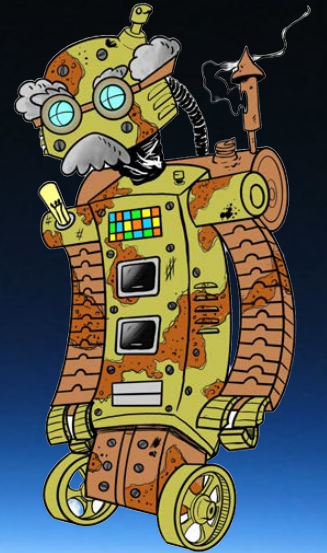

"Del" E. Tedd

Code A. "Bug"

Ms. Ima Loop

Dr. Cleverboard

All characters were created exclusively for TechnoArts Academy by Graphic Web Design.

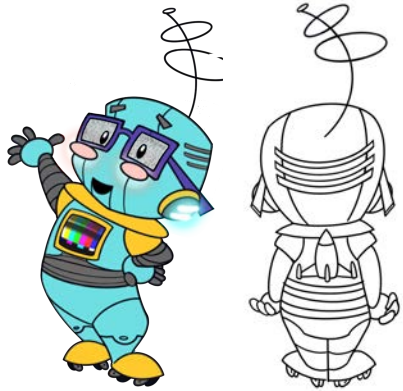

The Misadventures of Techie the Robot!

- This children's book series will be targeted at kids ages 4-8.
- Each misadventure will be funny and delightful and will have an unexpected twist at the end.
- New characters will continuously be added throughout the series.
- A new character named "Shifty" will be introduced soon!
- Each character will be named after or a spin off of a computer term.
- Each "kid" robot will have a special power that relates to their computer term.
- Each book will have a glossary in the beginning with the meanings of the computer language used in the book.

The Misadventures of Techie the Robot!

- The series is set in a far-off galaxy somewhere in the Milky Way in the year 3000.
- The school in the series is called TechnoArts Academy!
- Everyone is a robot and all have some kind of wheels to move around.
- The books will teach young students about space, the future, computer science, and math in a fun adventure.

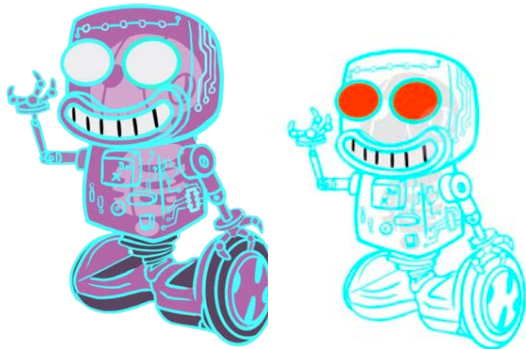

Special Powers...

Techie has a rocket on his back. His rocket is a drone. He can send his drone off to check things out and the images appear on the screen on his stomach.

Bluberri Pi is a spin off term from the computer term “raspberry pi.” Raspberry Pi is a credit card sized computer that can do almost anything. We gave Bluberri Pi the ability to calculate almost anything. Her calculations come up as a hologram above her head.

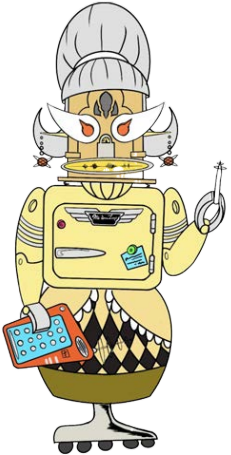

Del E. Tedd is called Del by his friends. Del can disappear at a moment's notice just like when you “delete” something from your computer. When he's invisible, his eyes glow red.

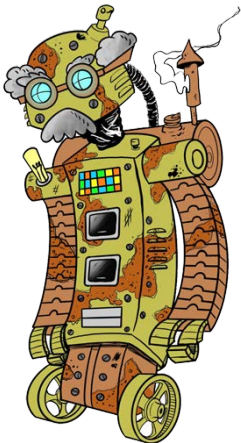

Special Powers...

Code A. Bug is just called Bug by his classmates. Bug can turn himself into anything just like a virus or bug in your computer. He can be a bit mischievous and is usually trying to get the trio in trouble.

Ms. Ima Loop is the teacher at TechnoArts Academy. She doesn't have a special power, but she does repeat everything! Just like her name, looping in computer language is when something repeats.

Dr. Cleverboard is a spin off name of "motherboard." A motherboard is the main circuit board in a computer. Dr. Cleverboard is the principal at TechnoArts Academy and is very old. He has a hard time keeping up with all the kid robots.

Our book series is part of our Literacy Plus Program

- **Literacy + Computer Science + Arts + Science + Math!!**
- Students will be involved in the creation of new books, storylines and characters!
- This is a one-of-a-kind literacy plus project that will give students the opportunity to create in many different ways on many different levels.
- Numerous projects will be built around the series using the books or creating new ones.
- **We are the ONLY school in the country offering this unique opportunity!**
